REVEREND SIR,

It is with some diffidence that I venture to dedicate to you this my Collection of Problems. In order to render the stratagems worthy of your patronage, I have taken especial care to add many hitherto unpublished, which may possibly serve to amuse even you, who are so great an adept in the art. Should they meet with your approbation, I shall esteem myself well repaid for the trouble they have given me.

I must not, however, take upon myself the entire credit of this work, for I have to thank Mr. Horwitz for the assistance he has afforded me ; and my kind friend Mr. Charles Kenny is honestly entitled to my warmest acknowledgments, not only for the general superintendence of the work, but also for several valuable hints during its progress through the press.

I remain,

REVEREND SIR,

Yours obediently,

J. KLING.

CIRENCESTER PLACE,  
MAY 24, 1849.

## P R E F A C E.

THE kind solicitations of some of my intimate friends have induced me to publish this collection of Problems. My first intention was, that they should form a supplement to a more instructive work than I conceived this would be—namely, a Treatise on the Endings of Games, by my friend Mr. Horwitz and myself; a subject which has occupied our leisure hours for some time past. My professional avocations have so long delayed the completion of our labours, it was deemed advisable to send forth to the numerous lovers of Chess my collection of Problems—which, I am proud to say, have been praised by the first players of the day.

The indulgence of the public is requested for such errors as may have possibly crept in; for though I have bestowed great care in trying to render the volume perfect, I am sorry to find that two corrections were omitted to be altered; and in order that my readers may not waste time in endeavouring to solve imperfect Problems, they are requested to

make the following alterations before they proceed to examine them :—

Problem, No. 89.—The Black Pawn should be on K. R. seventh, instead of on Kt. seventh.

Problem, No. 151.—In the form in which this Problem is printed, mate can be given on the move. The Queen should simply be on Q. R. eighth square instead of on Kt.'s eighth. The solution given is then correct.

Should other errors be discovered, I respectfully request that notice of them may be forwarded to me, in order that they may be inserted in the work on the Endings of Games, which Mr. Horwitz and myself hope to be enabled to complete before the expiration of this year.

J. KLING,  
*Professor of Music.*

No. 22.\*

Q. to K. R. second, mating next move.

No. 23.\*

Q. R. P. takes P. *en passant*, and mates by Castling.

*Note.*—This problem I have composed expressly to shew the error the modern composers of problems have committed, in introducing the system of castling in the ends of games. In this problem I consider I have as good a reason to say that Black has just moved his Q. Kt. P. two squares as that White has *not* moved his K. R. or K.
